AUDACIOUS GOALS INITIATIVE
...restoring vision through regeneration of the retina

Seminar Series in Neuroregeneration

“Molecular Cues for Axon Guidance and Regeneration”

JOHN FLANAGAN, PH.D.
PROFESSOR
DEPARTMENT OF CELL BIOLOGY
HARVARD UNIVERSITY MEDICAL SCHOOL

April 6, 2016
4:00 p.m. - 5:00 p.m.
Building 35A, Room 620/630
Porter Neuroscience Research Center
National Institutes of Health

The NEI AGI Seminar Series in Neuroregeneration explores topics relevant to regenerative neuroscience, with special emphasis on the visual system. The AGI is a sustained effort by the NEI to catalyze research toward developing medical therapies for disorders of the retina and its connections to the brain. Success of the NEI AGI relies on input from a range of disciplines and has implications across the field of regenerative medicine.
