National Eye Institute

AUDACIOUS GOALS INITIATIVE

…restoring vision through regeneration of the retina

Seminar Series in Neuroregeneration

"Assembly of Feature-Detecting Circuits in the Retina"

Joshua R. Sanes, Ph.D.
Director, Center for Brain Science &
Professor, Department of Molecular and Cellular Biology
Harvard University

November 2, 2015
3:00 - 4:00 pm
Lipsett Amphitheater, NIH
Clinical Center, Building 10

The NEI AGI Seminar Series in Neuroregeneration explores topics relevant to regenerative neuroscience, with special emphasis on the visual system. The AGI is a sustained effort by the NEI to catalyze research toward developing medical therapies for disorders of the retina and its connections to the brain. Success of the NEI AGI relies on input from a range of disciplines and has implications across the field of regenerative medicine.
